

## ENGLAND

Magnatron overseas grower, Terry Rayner, who experienced an increased yield of 86% stated "Our traditional cucumber sandwich was tastier with Magnatron cucumbers".

## THE TIME HAS COME!

From the corn fields of the mid west to the vast California vineyards and growing cornucopias, from the Florida orange growers to the northern plains of winter wheat, increased yields are available to all. Clearly the future is here and now for this technological break-through in crop production management. Whether you have a two foot square garden or tens of thousands of acres the *Crop Booster* results are the same in providing a faster and higher quality yield.

**CROP BOOSTER IS  
READY TO WORK  
FOR YOU**

The MAGNATRON GROUP makes a full line of Agricultural *Crop Booster* Systems that simply clamp on any size irrigation piping. Easily installed in minutes, the MAGNATRON *Crop Booster* systems pay for themselves over and over again by

providing increased yields and larger profit margins.

The *Crop Booster* is one of many revolutionary magnetic appliances that put The Magnatron Group at the forefront of cost saving, environmentally conscious products. The MAGNATRON line of Fuel Maximizers and Hard Water Conditioners, for home and industry, are energy and money saving systems that reduce and eliminate air and water pollution problems.
