TO WHOM-SO-EVER IT MAY CONCERN

MAGNETIC WATER CONDITIONER

Magnetic Water Conditioner was tried on irrigation in a Tea Nursery in our Phulbari Tea Estate, between the 1st February and 15th May and the Senior Manager's observations were:

"Treated plants (i.e. irrigated with the use of Magnetic attachment fitted to the delivery end of the irrigation pipe) (a) showed additional growth of average two extra leaves, (b) the darker hue on the plants indicated better vigour, (c) lateral growth was more and vigorous when compared with control plants."
